

Bp Premier Saffron SP2 Rev1 Release Notes

These release notes describe the changes made to Bp Premier since Saffron SP2 build 1.11.2.952.

Release Date	25 November 2021
Release version	Bp Premier version Saffron SP2 Rev1 (1.11.2.955)
Notes last updated	25 November 2021
What is in this release?	This release of Bp Premier includes a small number of bug fixes.
Which version can I upgrade from?	You can upgrade to version Saffron SP2 Rev 1 from Bp Premier version Indigo SP1 (1.9.1.863) or later. To check the current program version that you have installed, select Help > About .
Which data update do I need?	You must install the May 2021 Data Update or later before you can upgrade to version 1.11.2.955. However, Best Practice Software recommend making sure you have the most recent Data Update installed before you run a program upgrade.
Which database and operating system versions are supported?	Windows operating system Windows 8.1 or higher is supported. Microsoft Windows Server 2012 and higher is supported. Microsoft SQL server 2012 and higher is supported.
When should I upgrade?	Best Practice Software recommend running the program upgrade outside of business hours.
How do I upgrade?	Brief upgrade instructions are included in this document.
What do I do after upgrading?	If you have not yet done so in Saffron SP2, you will need to connect to Medicare Web Services via Setup > Configuration > PRODA. You must successfully set up a connection with Medicare Web Services in order to use some online patient verification functions in this build of Bp Premier.

Upgrade to Saffron SP2 Rev1 1.11.2.955

You must have the **May 2021** data update or later installed before you upgrade to 1.11.2.955.

1. Back up your Bp Premier database before running the upgrade.
2. Synchronise all workstations in remote database mode with the Bp Premier server before you upgrade.
3. [Download](#) and [run](#) the latest Drug Update on your Bp Premier server computer.
4. Log all users out of the server and all clients before you upgrade.
5. Download and run the 1.11.2.955 update on your server and all clients.
6. Log back in to Bp Premier and resume use.

Upgrade notes

NOTE If you have not done so in Saffron SP2, after upgrading, to use some online patient verification functions you **must** successfully set up a connection with Medicare Web Services via Setup > Configuration > PRODA.

For information on registering with PRODA, select **Help > Online** to open the Bp Premier knowledge base and search for 'proda'. For information on setting up Medicare Web Services in Bp Premier, search for 'mws'.

Where do I find more information?

Select **Help > Online** from Bp Premier to open the Knowledge Base.

Enhancements
