

## How to integrate Bp Premier with Lyrebird

1. Ensure Bp Premier version Orchid SP2 or later is installed, and approve **Lyrebird Health** as a third-party integration in **Setup > Configuration > Database > Setup third-party integrations**.
2. The **Lyrebird Scribe** button will be visible in **Setup > Users > Edit** for users with **Add/Edit** user permissions for **Clinical Notes** and contains the users unique **API key**.
3. From the **Patient Record**, select the **Lyrebird** icon (L) and follow the prompts to create a **free Lyrebird account**. Once you have obtained consent from the patient, you can start using Lyrebird!

1. **Setup third party integrations**

The third-party software providers listed below are members of the Best Practice Partner Network. You will need to approve partners by selecting them from the list if you would like to grant them secure access to your Bp Premier data.

Some partners will require a pairing code to enable integration. Should the code expire before use, another one can be generated.

Search for: **Lyrebird**

Third-party providers

**Lyrebird Health (via Halo Connect)**

2.

Business name:

Requires a referral for Medicare billing

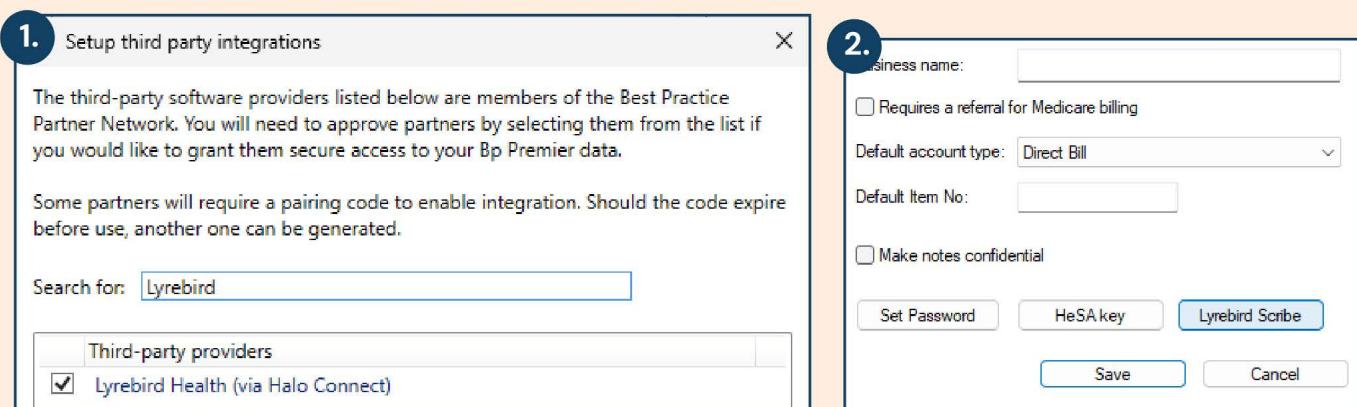

Default account type: **Direct Bill**

Default Item No:

Make notes confidential

**Set Password** **HeSA key** **Lyrebird Scribe**

**Save** **Cancel**

3.

Lyrebird Scribe
