eScript Management (AU)

Modify an eScript

1. From the **Prescriptions** (F9) screen, highlight the medication and select **Modify**.
   - If the eScript has **not** been sent via eRx, all fields in the Prescription Item Details screen can be modified.
   - If the eScript **has** been sent via eRx, you have 10 minutes to modify it before the eScript will be locked.
2. Once the eScript is modified, select **Amend** to send the updated eScript.

Delete or Cancel an eScript

Go to **Prescriptions** (F9) > select an eScript > **Delete**.

Note: The logged in user must be the same as the Prescriber of the eScript to delete the medication.

Cease an eScript:

1. In the **Prescriptions** (F9) screen, highlight the medication from the Medications History grid.
2. Right-click on the medication and select **Cease Medication**.
